Hiring Manager

Optimizely

Dhaka, Bangladesh

Subject: Application for Software Engineer I Position

Dear Hiring Manager,

I am excited to apply for the **Software Engineer I** position at Optimizely. With a **B.Sc. in Computer Science** and **2.5 years of experience** across web and game development, I bring strong technical skills in **JavaScript, TypeScript, React, Node.js, and C#**, combined with hands-on practice in agile workflows, testing, and troubleshooting.

At **Ajker Patrika**, I develop and optimize in-house projects, manage deployments, and integrate advertisements. During my time at **Brain Station 23**, I contributed to **PharmaSphere**, a pharmacy e-commerce platform, and built responsive applications using **React, TypeScript, REST APIs, and Tailwind CSS**. My earlier role at **Imaginary Workstation** as a Unity Developer strengthened my teamwork and problem-solving skills in C#.

In addition to professional roles, I built projects such as **SnapShop (React + TypeScript e-commerce platform with authentication and wishlist features)** and **Kamrul Hasan (a dynamic personal site with admin panel management)**, demonstrating my ability to deliver well-structured, user-focused applications from end to end.

Optimizely's focus on growth, collaboration, and best practices resonates with me. I am eager to apply my skills, adapt to your development processes, and contribute to building high-quality solutions as part of your global team.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my background aligns with your needs.

Sincerely,

MD.MAHABUB SAZID HABIB
